Assessment Questions

1 General information

1.1 Is this new or existing work?

Response

New

Justification

None

1.2 Please describe the work

Response

To co-produce, evaluate and test practical dementia tools for frontline care staff related to non-pharmacological approaches to management of stress and distress (S&D), and improved dementia care.

Co-produce tools with representative sample of front line care staff.

Front line care staff will be more easily able to identify potential causes of stress and distress in people with dementia, and to implement non-pharmacological approaches. This will reduce time staff spend dealing with such incidents, freeing up time to care

People with dementia will benefit in quality of life (QoL) outcomes – less S&D, increase weight etc.

Associated aims include- reduction in S&D incidents, reduction in use of sedating psychoactive medicines, improved QoL measures, engaged staff.

Feedback will be gathered during this project as evidence to inform this work going forward.
