

The Care Inspectorate believes that every person in Scotland should receive high-quality, safe and compassionate care that reflects their rights, choices and individual needs through their whole care experience.

LGBTI young people and trans young people often lack the confidence to report harassment and discrimination.

**60%**  
of older gay people are not confident that social care and support services will be able to understand and meet their needs.

LGBTI people continue to face prejudice and discrimination in Scotland.

**33%**  
of LGBTI people would be uncomfortable being open about their sexual orientation or gender identity with adult social care staff.
